mstar ?
papirpost?

Links to a page with all the videos
Probably a grid one, or just a list
There will only be 6 or so altogether

Links to the article list, by section
Which is also functioning as archive
Each article will link to its own page

The right menu's function is as yet unknown

Will need the following:
index.html
wildcatlive.html
wildcatpost.html
howto.html (maybe)

and then a page for each article, like:
wildcatpost/how-to-look-like-broccoli.html

Sections are listed in the shared google doc;
photoessays beats photojournalism?

Should Sports have its own updates on the front page, bottom?
Should we have a footer with links to our instagram accounts?
Can we use the APIs effectively?
